

DOGE-1: The First Meme in Space

WHITEPAPER

Date: October 5, 2025

DOGE-1 Mission

The DOGE-1 satellite mission is the first lunar mission fully funded in Dogecoin, developed by Geometric Energy Corporation and launched aboard a SpaceX Falcon 9. Aiming for orbit around the moon in 2026, the 12U CubeSat will carry a digital display broadcasting art and logos back to Earth, turning crypto culture into space history.

This isn't just another meme - it's culture breaking barriers, crypto making history, and DOGE fueling space exploration.

We don't just say "to the moon". We are literally going there!

Mission Statement

DOGE-1 exists to blend meme culture, real-world milestones, and blockchain innovation into one unified movement - taking crypto where no meme has gone before: outer space.

Token Information

Token Name: DOGE-1

Symbol: \$DOGE-1

Network: Ethereum (ETH)

Total Supply: 1,000,000,000

Circulating Supply: 1,000,000,000

Contract Address: 0x806F34a69A5fa99094aDEBAd73af880C60e27dE5

Socials: -X: @DOGE1TOMOON

Phase 1 - Foundation & Mission

- Announce DOGE-1 Satellite Mission inspired by the historic Dogecoin-funded SpaceX Falcon 9 lunar project.
- Establish DOGE-1 brand: "The first meme in space."
- Build a strong community base across X, Telegram, and Web3 channels.
- Begin early development of Moonstore, our flagship launchpad utility.

Phase 2 - Utility Development (Q4 2025)

- Launch Moonstore Beta, a free-to-use launchpad for deploying tokens directly on DEX.
- Build supporting ecosystem: Moonstore Lounge, full marketing campaign, and buyback & burn system.
- 10% of Moonstore revenue allocated to burning DOGE-1 tokens.
- Earn 50% lifetime trading fees every time your token trades post-launch.
- Expand roadmap for future utilities and tools.

Phase 3 - Expansion & Adoption (Q1 2026)

- Public release of Moonstore for all builders and projects.
- Drive early adoption through strategic partnerships and builder incentives.
- Targeted marketing campaigns across crypto.
- Continue developing additional utilities supporting long-term growth.

Phase 4 - Major Listings & Global Reach (Q2 2026)

- Execute major CEX listing strategy (MEXC, Gate.io, KuCoin, BitMart).
- Strengthen liquidity and expand trading volume across exchanges.
- Solidify DOGE-1 as a cultural & utility-driven meme project transcending hype and entering crypto history.

Vision

DOGE-1 isn't just a meme - it's a movement to unite culture, crypto, and cosmic exploration. Backed by a based and proven team from multiple multi-million dollar projects, DOGE-1 is setting a new standard for meme projects with real utility, real milestones, and a mission literally out of this world.

DOGE-1 - Beyond Memes. Beyond Hype. Into History.

MOON.STORE LAUNCHPAD

MOON.STORE is the core utility and ecosystem driver of the \$DOGE-1 mission, a next-generation launchpad designed to empower communities, builders, and investors alike.

Built with accessibility and fairness at its core, MOON.STORE lowers the barriers of entry for token creation, while offering powerful incentives for long-term ecosystem growth.

Key Features

Free Token Launches on DEX

At its Beta stage, MOON.STORE allows projects to launch tokens directly on decentralized exchanges without upfront fees. This makes it possible for anyone, from indie developers to large teams, to bring new tokens to market instantly.

Moon.Store Lounge & Marketing Hub

A dedicated Lounge will connect creators, early investors, and the broader community. Coupled with a full-scale marketing rollout, MOON.STORE ensures visibility and reach for all listed projects.

Buyback & Burn Mechanism

To support token value and reduce supply, 10% of MOON.STORE revenue is allocated to regular buyback and burn events. This creates a deflationary pressure that directly benefits holders.

Revenue Sharing Model

Token creators can earn 50% lifetime trading fees from all tokens launched through MOON.STORE. This aligns incentives across the ecosystem and rewards early supporters.

Cross-Chain Expansion

MOON.STORE launches with support for Ethereum and Base, with additional chains to be integrated in future phases. This multi-chain approach expands opportunities for projects and investors, positioning MOON.STORE as a universal launchpad.

Vision

More than just a launchpad, MOON.STORE is an ecosystem builder. By turning degens into astronauts, it provides the tools, community, and incentives needed to take projects from idea to orbit. Through fair launches, sustainable economics, and ecosystem utilities, MOON.STORE will establish itself as the go-to hub for next-generation token launches.
